

The ICCC of the Institute of Program Systems of the Russian Academy of Science, Associated UNESCO school, is situated in 130km from Moscow, 8 km from the town of Pereslavl-Zalessky in the Kukhmar forest. Pine forest, fresh air, majestic beauty of the Plescheevo Lake - it is here where children come from all around Russia, Germany, the USA, Belgium, England, and France.

In the period of informatization and computerization of society, the problem of preparing the young generation, to be skillful in the field of new computer technologies becomes very important. The ICCC solves the problem by involving scientists, specialists, and pedagogues of academic institutes of Russia and educational establishments of the world in teaching children.

This process of teaching has a number of peculiarities. One of them is for those children who are really interested in studying sciences using

computer knowledge together at the Center and to put them into well equipped 'computer environment, where the children's intensive communication with their teachers, computers, and their fellow campers enforces and accelerates the learning process. The educational process the ICCC includes scientific

research in the fields of creating and using computer software and scientific programs and methods. Since 1995 the Center has had a year-round correspondence program, as well as permanent educational courses in the following fields:

Computer technologies:

- ✓ Programming languages
- ✓ Desktop Publishing and Journalism
- ✓ Information center
- ✓ Telecommunications (email, Internet, WWW, HTML)
- ✓ Computer music
- ✓ Computer games
- ✓ Computer ABC's
- ✓ Multimedia programs
- ✓ Computer graphic and animation
- ✓ Mathematics and computer

All computers are connected to local network and have a full access to Internet.

The Center also offers courses in the humanities:

- ✓ English
- ✓ German
- ✓ History and Geography
- ✓ Linguistics
- ✓ World arts and cultures
- ✓ Literature club
- ✓ Painting and architecture
- ✓ Natural sciences
- ✓ Ecology
- ✓ Physical biology
- ✓ Mathematics
- ✓ Artistic creativity
- ✓ Arts studio
- ✓ Fashion studio
- ✓ Russian handicraft
- ✓ Music studio
- ✓ Word Art

full time education is conducted in the Center. The Center also includes the «Leisure program», «Sport program», competitions, shows, TV-conferences, different clubs, balls, discos, movies, concerts, celebrations, and games. Children at the Center also have access to:

1. Library, containing a variety of scientific and literary works
2. Choreography classes to learn different dance styles
3. Sports facilities, including tennis courts
4. Beautiful sandy beach
5. Shower rooms
6. Sport facilities

Children live in 2-story centrally heated brick buildings, in rooms of 2-4 persons with new furniture. Children have five meals a day. Excursions are offered around The Golden Ring Cities of Russia.

The Center consists of many departments. The Academic Council of the Center has its own newspaper, Internet site and radio news program produced by children. Children attend educational courses and take part in projects. The projects allow them to see the real results of their creative activity. For correspondence students - to carry on permanent scientific work all the year round, and to take part in international educational projects over Internet.

The educational program of the ICCC takes into consideration the age aspect of children's development. Different ages correspond with different forms of teaching.

During summer, spring, winter, and fall vacation
